Professional Summary

Human-centered UX/UI Designer with experience creating intuitive, accessible digital products through wireframes, high-fidelity prototypes, and usability testing. Skilled in design thinking, interaction design, and accessibility (WCAG), translating business goals into seamless user journeys. Experienced in user research, information architecture, and iterative design to deliver engaging, scalable solutions that improve usability and reduce friction. Recognized for critical thinking, empathy, and communication skills, with the ability to collaborate effectively in agile environments.

Skills

Design & Prototyping: Elementor, diagrams.net, Adobe XD, Wireframes, Storyboard, Figma, Sketch, Photoshop, Animation & interactions, Design systems & component libraries, Human-Centered Design, Accessibility (WCAG).

UX Research & Strategy: Contextual interviews & surveys, Personas & journey mapping, Usability testing & heuristic evaluation, Information architecture, Lean Canvas, Affinity Diagram, User interviews, Interaction design patterns.

Front-end skills (Supporting UX): Python, Tableau, HTML5, CSS3, Windows OS, Microsoft Office 365, Node.js, JavaScript, React.js fundamentals, Responsive & accessible design, Github, Visual Design, User Experience.

Experience

AI/ML UX Design Intern (Design Lead) – PM Accelerator July 2025 - Present

Led AI/ML UX design projects, conducting user research and usability testing to create intuitive experiences; built rapid prototypes in Figma to validate design concepts.

UX Designer (Volunteer) – Open Evaluation, Nonprofit Organization **Sept** 2025 – Feb 2026

Developed sitemaps, low-fidelity wireframes, and user personas while also contributing to customer journey design, evaluation flows, and additional UX deliverables for an AI transparency platform.

AI UX Lead – Construction Learning (Based in India) April 2022 - Present

- Led user research and product discovery to define core workflows for global learning, career, and community platforms.
- Designed complex systems and high-fidelity clickable prototypes for large-scale dashboards and Game UX.
- Developed and shipped polished, production-ready UIs in React for multiple user-facing and admin-side websites.
- Delivered end-to-end responsive interfaces using Tailwind, JavaScript, and PHP, integrating front-ends with REST APIs.
- Selected case projects under this role
  - Trikona – Construction game (View project ->)
  - Construction world (View project ->)

UX Design Projects

VerifyLens.ai | (View project->) 10/25 - 12/25

- Led end-to-end UX for VerifyLens.ai, conducting workflow research with journalists and students, then designing IA, user flows, and high-fidelity web + Chrome extension prototypes for real-time fact-checking.
- Designed core flows for live claim detection, quick checks, history, and claim detail, and translated findings into developer-ready UX artifacts to support implementation.

Clyra.ai (AI Productivity Assistant) - @ PM Accelerator | (View project->) 07 – 09/2025

- Led UX research and design for a 4-designer pod; conducted surveys and interviews to shape flows and personas for email-to-task automation and wellness-aware scheduling.

VibeTrail.ai (AI Event Visualization Platform) - @ PM Accelerator | (View project->) 07 – 09/2025

- Conducted user and competitor research, synthesized insights into personas and user journeys, and designed wireframes improving alignment between planners and clients.

Fit Flow (AI-Powered Fitness App) (View project->) 03 - 05/2025

- Conducted interviews (15 users) to gather pain points around women's health, self-defense and fitness.
- Developed personas, user flows, and low-fidelity wireframes and built interactive Figma prototypes.

One VR World (Collaborative VR Design Environment) | (View project->) 09 – 11/2024

- Created immersive VR mock-ups using Figma and Canva.
- Facilitated usability sessions, capturing quantitative task times, qualitative feedback and simplified on-boarding flow.
